SPECIFILM RTU is designed to be used as an evaporation retardant and finishing aid on concrete flatwork of all types. When sprayed over fresh concrete, SPECIFILM RTU forms a thin, continuous film which prevents rapid moisture loss from the concrete surface. SPECIFILM RTU is especially effective when concreting operations must be performed in direct sun, wind, high temperatures, or low relative humidity.

- Already formulated to an optimum dilution of 5 to 1 for maximum effectiveness
- Helps minimize surface cracking due to early water loss of silica fume concrete
- Helps minimize surface cracking due to early water loss of silica fume concrete
- Dyed pink as visual application aid. VOC compliant
